• Overhead Valves
• Cast Iron Cylinder Sleeve
• Dual Ball Bearings

OPTIONAL COMMERCIAL ENGINE

POWERED by
HONDA
GX120

OPTIONAL FRONT ROLLER

Since 1935, California Trimmer mowers have been manufactured with the commitment to produce the best power reel mower available.

California Trimmer reel mowers will provide you with a healthy lawn that has the look of a finely manicured golf green. Rotary mowers tear and rip the grass removing nutrients resulting in brown spots, rough growth and thatch.

Reel mowers make very clean, sharp cuts, like a pair of scissors. When grass is cut in a clean, smooth manner, moisture and nutrients are locked in promoting healthy growth and less maintenance.

CONVENIENT CLUTCH SYSTEM

A simple hand lever controls the smooth engagement of the durable belt / chain drive which provides direct and variable speed mowing for every type of operating condition.

SUPERIOR CUTTING ACTION

Our reel and cutter bar are made of heat-treated high carbon steel for sharper blades and a longer lasting cut that provides beautiful results and improves overall lawn health.

HEAVY-DUTY DRIVE SYSTEMS

The main axle and reel blade shafts are supported by full-sized ball bearings and are driven by large chains and heat-treated sprockets.

9" DEEP TREAD DRIVE ROLLER

The extra-wide and grip textured surface area provides solid traction to effectively propel the mower while protecting the grass.

EXTRA-LARGE GRASS CATCHER

A capacity of up to 2 bushels (70 liters) reduces emptying stops and starts. Made from durable high-density polyethylene, their simple and convenient mounting method provides easy access and removal.
